EDUCATION

Purdue University

Bachelor of Science in Computer Graphics Technology

Major: Web Programming and Design | Minor: Computer Science

West Lafayette, IN

May 2025

EXPERIENCE

Graphic Design Marketing Intern

LVLUP-N-COMING

May 2026 – Present

Remote

- Design branded social media content and marketing assets for multiple digital platforms using Figma, Canva, and Adobe Creative Suite.
- Apply UI/UX and visual hierarchy principles to improve readability, engagement, and communication effectiveness.
- Collaborate with marketing and leadership teams to develop cohesive visual systems and scalable content templates.
- Create UI-inspired visual assets including icons, illustrations, mascots, and reusable graphic templates to strengthen brand consistency.

Full Stack Web Development Intern

Business Web Solutions

November 2025 – January 2026

Remote

- Designed and developed responsive web applications using HTML, CSS, JavaScript, React, Django, and Python, focusing on clean user-friendly interfaces.
- Built reusable, accessible UI components using Bootstrap and jQuery, applying UI/UX principles to ensure visual consistency and usability across breakpoints.
- Wireframed and prototyped interface layouts in Figma prior to implementation.
- Integrated front-end interfaces with RESTful APIs and SQL databases, enabling real-time data rendering with seamless user interactions.

Software Development Intern

Ravensbay

June 2023 – August 2023

Remote

- Gained hands-on experience with full-stack development using C# and SQL, building an understanding of backend systems that informs clean, integration-ready frontend work.
- Participated in design and code reviews, contributing to UI decision and iterating on features based on collaborative team feedback.
- Self-directed learning of an unfamiliar codebase and tech stack within a short ramp-up period, delivering contributions to an active project.

PROJECTS

CFP Website Redesign – Client Project

- Created wireframes and high-fidelity layout designs in Figma for a multi-page coaching website, prioritizing visual hierarchy, clarity, and user engagement.
- Designed responsive page structures with an emphasis on intuitive navigation, accessibility, and consistent brand identity across breakpoints.
- Translated Figma design concepts into functional front-end components using modern web technologies, bridging the gap between design and implementation.

Recipe Web App – React.js

- Designed and developed a full UI for a recipe search and submission platform, applying UX best practices to create an intuitive, visually clean interface.
- Implemented fully responsive layouts ensuring accessibility and consistent experience across desktop and mobile.

SKILLS

Programming Languages: HTML, CSS, JavaScript, PHP, C#, Java, Python, C, C++

Frameworks & Libraries: React.js, ASP.NET, Django, Bootstrap, jQuery

UI/UX & Design: Figma, Adobe Illustrator, Adobe Photoshop, Canva, Wireframing, Responsive Design, UI/UX Principles, Prototyping, User Interface Design, Maya

Databases & APIs: MySQL, SQL Server, PostgreSQL, RESTful APIs, JSON, AJAX

Tools & Platforms: Git, GitHub, MS Visual Studio, Eclipse, Linux/UNIX, Windows OS, CMS Platforms

Soft Skills: English (native), Spanish (conversational), Creative Problem Solving, Communication, Teamwork, Flexibility
